

## A quality career move that's head and shoulders above the rest

*A dynamic and growing pharmaceutical company, Takeda Pharmaceutical Company Limited of Japan is committed to improving the health and quality of life of people around the world. Employing 14,500 people in the U.S., Europe and Asia, Takeda is one of the world's top 100 companies.*

*Takeda Ireland Ltd. has played a key role in the group since being established in 1999 in custom built premises in the thriving town of Bray, Co. Wicklow and due to continued expansion we now require the following:*

### **QC Laboratory Supervisor – Bray, Co. Wicklow**

The successful candidate will have circa. 8 years experience of the QC function, most recently in a supervisory/management capacity and will be required to provide an overall analytical function to a busy and fast paced solid dosage manufacturing facility. Responsibilities will include QC testing, stability/environmental programmes as well as continuous technical transfer and validation activity. You will receive top class support to aid self-development as you gain exposure to a full range of management functions including co-ordinating a lab of 40 staff, being responsible for training, health and safety, budgets and lab resources.

### **Future Career Opportunities**

If you have experience in any of the following areas our client would like to hear from you as they will be actively recruiting in early 2007: QA, QC, Production Supervision, Process Engineering, Electrical and Mechanical Plant Support or Documentation.

Takeda offers successful candidates a very attractive remuneration package in keeping with a progressive worldwide pharmaceutical company.
